Career Description
Lean manufacturing or lean production, often simply, "Lean," is a production practice that considers the expenditure of resources for any goal other than the creation of value for the end customer to be wasteful, and thus a target for elimination. Working from the perspective of the customer who consumes a product or service, "value" is defined as any action or process that a customer would be willing to pay for.

Admission Requirements
In addition to the college admissions policy, students must:
- Be 16 years of age or older.
- Meet entrance exam requirements.
