

Aviation Maintenance Technology Program at a Glance

Program Description

This program meets the requirements for students to take the exam for the airframe and powerplant mechanic certificate, and is an FAA Part 147 regulated program. The certificate authorizes the holder to approve aircraft that has undergone inspection or maintenance “for return to service”. This curriculum is approved by the Federal Aviation Administration. Graduates from this program are in demand not only in the field of aviation but in other fields that require a high degree of mechanical knowledge.

Enrollment Requirements:

- Be 16 years of age or older

Program Start Dates:

Late August, early January, & early May. However, students can start general education courses in August, October, January, March, and June.

Visit our Campus!

We will cover everything you will need to know about:

- Information about the Aviation Maintenance Technology program
- Assist with completing our WATC application
- Give information about enrollment and the FAFSA application
- Tour of campus and program

Frequently Asked Questions

Q. How do I get started?

- A. We would invite you to meet with our advisor to discuss the program. You can schedule an appointment via email or phone call.

Q. When can I start the Aviation Maintenance Program?

- A. The primary start dates are in late August early January and early May. However, you can begin general education classes in January, March, June, August and October. Please check with the admission counselor or academic advisor for more details.

Q. Do I become FAA certified after completing this program?

- A. Students who complete each section of the program qualify to take the written and Oral/Practical certification exams. Students who successfully complete these exams become FAA certified. The written exams are included in the tuition cost, the Oral and Practical have an extra fee and are administered by an FAA approved Designated Mechanical Examiner (DME). The costs for the Oral and Practical Exams are not included in any of the college costs since it is administered through the FAA and total costs are \$900 to take the exams.

Q. Are tools required for this program?

- A. Yes. Tool set costs are not included in the cost of tuition and fees. Tool sets are received at the end of Airframe II and Power Plant II semesters, and the tool set charge is added to the student's account a week after classes have started during those two semesters.

Q. What wage can an Aviation Maintenance Technician expect?

- A. According to the Bureau of Labor Statistics; mean wages for individuals in this field are approximately \$58,850 annually or \$28.29 per hour. The typical entry-level education for this field is a certificate of completion or a technical certificate, making \$19-\$21 an hour starting in the industry. The CIP code for this program is 47.0607.
